LIGHTING 2019

POTTER DS - PENDANT CHARCOAL GLAZE FINISH

The Potter DS ceramic lighting family is the product of an ongoing collaboration with our long term lighting and production partners, Rakumba Lighting and Michael Skewes Pottery. Available in pendant and wall formats, the DS fittings are simple, refined and timeless; a design that is equally suited to both classic and contemporary environments.

POTTER DS

POTTER DS
WALL LIGHT
CHARCOAL GLAZE

Made using a hybrid process of traditional pottery techniques and contemporary digital tools, the DS is simple and refined, favouring the quiet beauty of the ceramic surface.

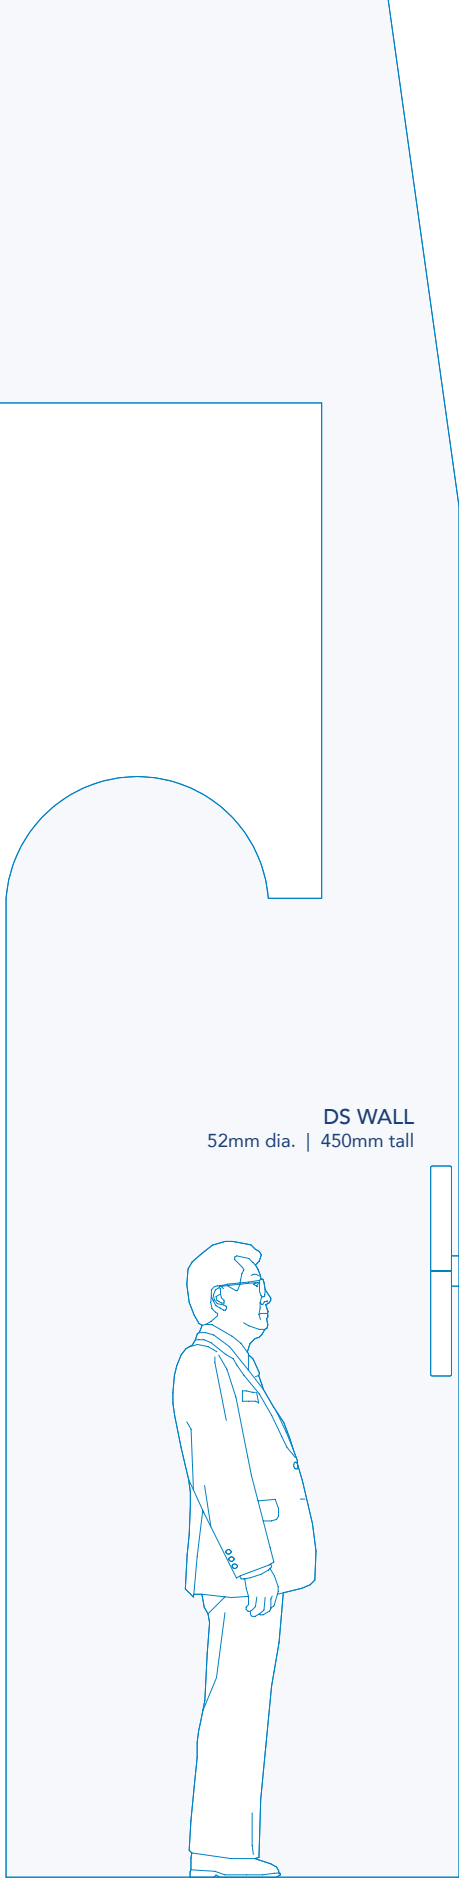

The external simplicity of the DS belies the internal sophistication of the fittings, produced using the latest LED technology and a series of aluminium and acrylic extrusions to house the mechanics and softly diffuse the light output.
