Wire Gentle

Tufted

50 % wool, 50 % Tencel®

25mm high

3900 gr/m²

7 colours

Maximum size without seams 450 cm × 400 cm,
550 cm × 300 cm

Wire Tough

Tufted

70 % wool, 30 % Tencel®

25mm high

4500 gr/m²

7 colours

Maximum size without seams 450 cm × 400 cm,
550 cm × 300 cm

Wire

Visionary design combining softness, and strength. *Wire* is a pioneering rug developed by Studio Linse, which offers an elegant fusion of structure, material and colour. It is the first rug to feature Tencel®, an innovative material made from eucalyptus wood from a replanting project. Surprisingly soft to the touch, it has, as its name suggests, a high-tech, metallic expression.

There are two versions of *Wire*, which are both made from a combination of wool and Tencel®: *Wire Gentle* and *Wire Tough*. The difference between them is the amount of Tencel® in the yarn.

Wire Gentle is constructed with basic yarns made from one thread. Made from 50 % wool and 50 % Tencel®, it features playfully intertwining loops, which gives it a vibrant expression.

Made from 70 % wool and 30 % Tencel®, *Wire Tough* also features a looped surface but is made using thicker yarns, consisting of three threads. This gives it a more robust look than *Wire Gentle*. In addition, the percentage of Tencel® varies between the yarns used in its construction, which creates eye-catching differences in colour and shine across its surface.

Paul Linse

Paul Linse graduated with distinction from the Design Academy in Eindhoven in 1987, where he started teaching ten years later. In 1999 he set up Studio Linse in Amsterdam, which is focused on interior design concepts, ranging from commercial and public spaces to smaller projects like private yachts. He has been responsible for furnishing several significant public buildings, such as Van Fishes, Schiphol Airport, the Amstelkwartier Hotel in Amsterdam, and the IBG head office in Groningen.
