

## GLISS-UP— PATRICIA URQUIOLA 2014

1—  
9

Gliss-Up is the first entirely suspended bedroom system. In her approach to wardrobes Patricia Urquiola overturns the traditional concept which simply stands units on the floor; here they are instead suspended to the wall. The space below is now freed up for use in other ways: for instance, with large shelves, these too suspended, to provide a space for drawer units, baskets and original design accessories. Gliss-Up is an innovative idea for storing everything we have around us; custom designed in the traditional finishes of the Gliss series and in the new cedar finish studied ad hoc for Gliss-Up interiors.

### FEATURES

Gliss-Up is the first completely suspended bedroom system for the wardrobe. It takes the traditional concept of a wardrobe as a floor-standing cabinet and hangs it on the wall. A free space remains on the floor, below the support shelves, which can be filled with other things, such as drawer units. The Gliss-Up wardrobe system has standard modules in different sizes (three heights and five widths), which can also be reduced to fit a space with special measurements. The support shelf comes in three standard widths and can be ordered custom cut to the centimetre (max. length for a single piece is mm 2982 - 117 <sup>3</sup>/<sub>8</sub>", minimum: mm 1342 - 52 <sup>7</sup>/<sub>8</sub>").

### Led lighting

Internal compartments of Gliss-Up wardrobes can be equipped with LED lighting. The lighting bar can be mounted on the top pieces or the shelves. In this case, shelves will have to be permanently mounted in their positions. For each shelf measure, we have make specific lighting bars with wiring compliant with European safety standards. For each compartment, there is a power supply kit with sensor to connect to the connector, which can be attached to a maximum of four kits.

## TECHNICAL INFORMATION

### WARDROBE FRAME, SHELF

Chipboard panel covered in Cedar wood (Cedrus) veneer or melamine facing.

### SIDE PANEL (WOOD INTERIOR, MATT LACQUERED EXTERIOR)

Chipboard panel covered in Cedar wood (Cedrus) veneer on the interior and melamine facing on the exterior, painted in Molteni range colours.

### SIDE PANEL (MELAMINE FACED INTERIOR, MATT OR GLOSSY LACQUERED EXTERIOR)

Chipboard panel covered with melamine facing. Exterior painted in Molteni range colours.

### SIDE PANEL (MELAMINE FACED INTERIOR, WOOD EXTERIOR)

Chipboard panel covered in melamine facing on the interior, and Eucalyptus wood (Eucalyptus Globulus) veneer on the exterior.

### HINGED DOORS

Chipboard panel covered in Eucalyptus wood veneer or melamine facing, painted in Molteni range colours.

### TRIM

Extruded aluminium covered with melamine paper or Cedar veneer.

### SIDE PANEL EXTENSION PROFILE

Extruded aluminium covered in Eucalyptus wood veneer or painted in Molteni range colours.

### CLOTHES RODS

Rod in chromed steel. Rod support bracket in chromed plastic.

### SUPPORT SHELF

Honeycomb panel, covered in Eucalyptus wood veneer or melamine facing, painted in Molteni range colours. Metal brackets for mounting on the wall.

### DRAWER UNIT FRAME

Chipboard panel covered with melamine facing, painted in Molteni range colours.

### DRAWER FRONT

Composite panel of MDF and sheet aluminium (1 mm thick), painted in Molteni range colours.

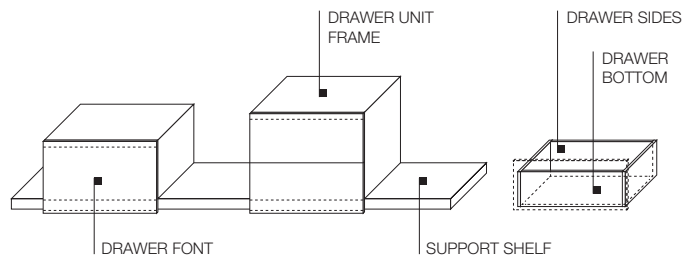

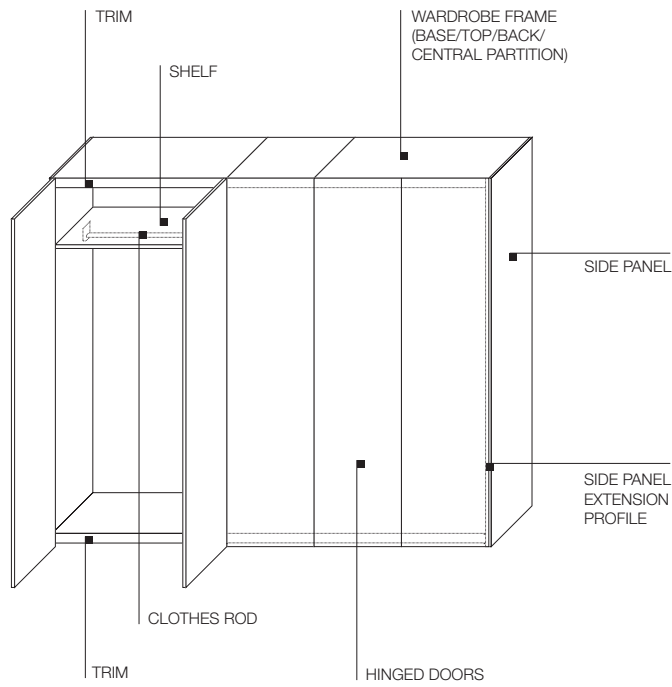

### SIDES AND BOTTOM - DRAWER INTERIOR

Chipboard panel covered with melamine facing.

## TYPES / DIMENSIONS

### Support shelf and drawer units

The standard model support shelf comes in three different sizes: mm 2982 (117 3/8"), 2654 (101 1/2") and 1998 (78 5/8").

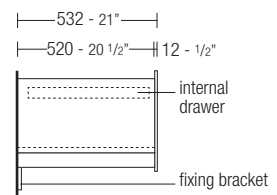

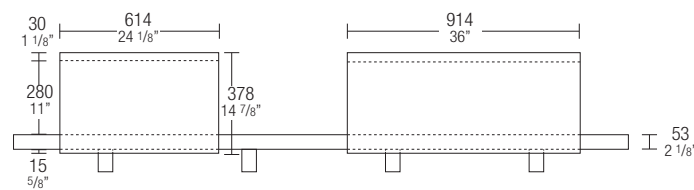

These sizes can be cut to measure to the centimetre. The minimum measurement possible is mm 1342 (52 7/8").

Drawer units are fixed elements which cannot be modified, and are made to always be positioned on the support shelf.

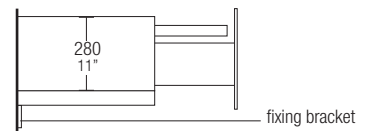

Drawers always have totally extractable runners and the interior is always made in cartapaglia anthracite.

# Molteni & C

### Drawer units H 280 (11")

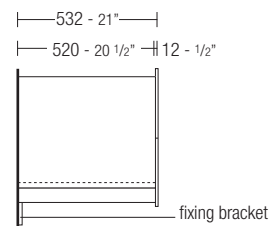

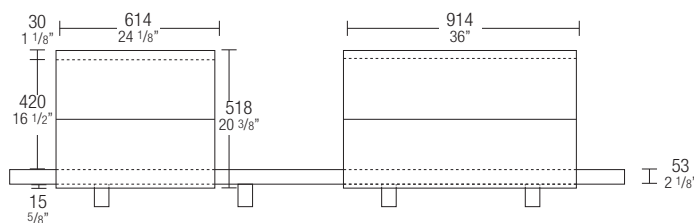

open

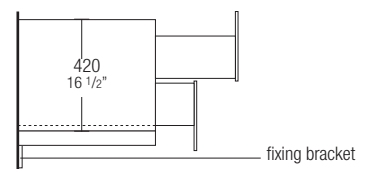

Drawer units H 280 (11") are always made with an internal drawer.

### Drawer units H 420 (16 1/2")

open

## WEIGHT LIMITS

### Instructions for mounting the wardrobe on the wall

Gliss-Up was tested in compliance with the UNI EN 14749 standard: “Domestic and kitchen storage units and worktops - Safety requirements and test methods.”

Each module can hold a maximum total weight of Kg. 120, and each single element has a weight limit (listed below) which must not be exceeded.

Specific brackets are provided to mount the wardrobe on the wall, but a kit of wall anchors is not provided because the appropriate fasteners must be defined by the dealer for each installation on the basis of the type of material used to make the wall and the structure of the wall. This guarantees safety and that wardrobe capacity is compliant with the weight limits listed herein.

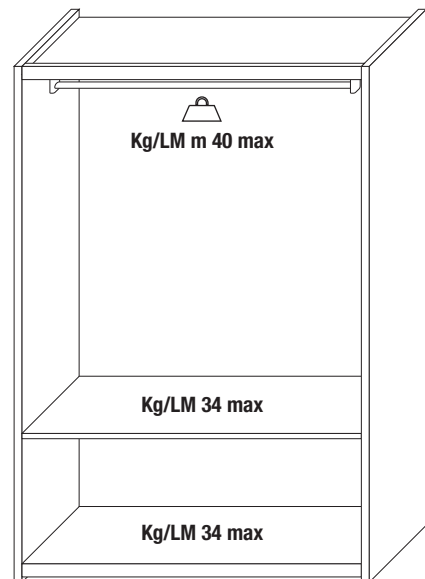

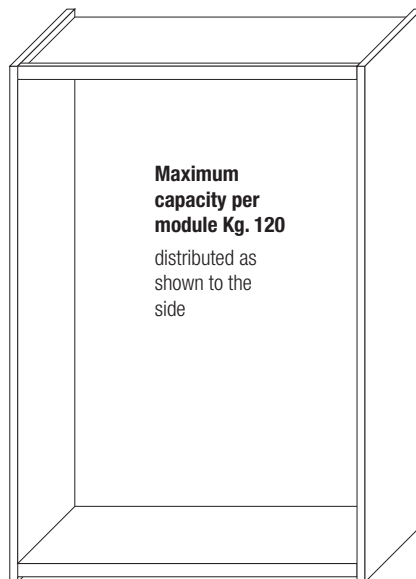

We recommend a very scrupulous evaluation of the structural conditions of the wall prior to ordering and mounting the product.

Plates and bars provided are made to measure depending on the dimensions of the wall mounted wardrobe and the position of the partitions. These parts cannot be modified afterwards.

Mounting procedures must be carried out in an excellent manner and after viewing the specific “Mounting instructions”. Stability and capacity of the wardrobe are guaranteed only by correct mounting and by following the manufacturer’s instructions.

---

### Weight limits

### Max. capacity per single element

with these capacities, shelf deflection will be in conformity with standard UNI EN 16121 - UNI EN 16122
