SKIN— JEAN NOUVEL 2007

1—
2

SKIN exists above all thanks to the bringing to life of Jean Nouvel's project the Musée du Quai Branly in Paris, reinterpreting the unique architecture designed for the museum and making it a product, both sculptural and innovative. Self supporting hide leather cover with a special pattern.

FEATURES

SKIN, a seating system, is the result of the collaboration over many years between Jean Nouvel and Molteni&C. A design which aims to combine research, technology, design and workmanship at the highest levels. SKIN offers innovative technology, such as its supporting frame in tubular pretensioned steel, with foam rubber inserts which act as the base for the structure cover in double face hide leather, featuring self-modelling geometric incisions.
