

Thea, the new upholstered system, originates from the female interpretation of shapes and from the balance of guidelines in apparent antithesis: comfortable, cozy - tidy, dynamic - rigorous, lightweight - highly compact.

Thea's eclecticism lies in the harmonious research of different points of view: frontally orthogonal, sideways tilted and concave on the back. The sofa is highly original and dynamic just because it melts all of these languages: it is a game of projections and shapes that gives its design a unique and recognisable sign.

Womanhood is enhanced by the coating: just like a dress that wraps and drapes volumes, folds perfectly stick to the modules' shapes.

Top care for tailoring details, as well as for the dictates of Italian tailoring, by using different seams. Application of bias seaming and contrast edging in three different colours (white, dove grey and dark grey) in order to define angles, curves and shapes.

Six functional accessories complete the collection, designed to express at best the whole system's versatile and practical nature. Upholstered furniture changes trim without using any mechanism, the wished comfort is achieved quite simply through small gestures.

The new "dynamic accessory" concept meets different needs and uses. Moreover it is able to adapt and transform in time. It changes during the various moments of the day, it modifies and updates over the years.

- **Headrest cushion:** draped, with contrast profile on the side sections. Equipped with shaped padding in polyurethane foam to perfectly fit the sofa's backrest, to allow for a more comfortable position. Available in the fabrics recommended for the sofa. Fully removable cover. Size: L64 H74.

- **Back cushion:** goose down padding, it reminds the softness of the headrest cushion and the coating draping technique, with detail of contrast profile. Available in the fabrics recommended for the sofa in the new linen,

silks and wools available. Fully removable cover. Size: L65 H25.

- **Square cushion:** goose down padding, a cushion with a simple look, but is sophisticated in the tailoring detail, with contrast profile to enhance its shape. Available in the fabrics recommended for the sofa in the new linen, silks and wools available. Fully removable cover. Size: L50 H50.

- **Quilt:** it dresses the backrest, thus changing the upholstery sofa image. Double face, the quilt features a side combined with the sofa's fabric, while you can choose the other one in the wide range of linen, silks and wools available. To play with contrasts as well as with tone-on-tone combinations is always possible, thus increasing the already high level of customisation. Quilting is the special feature, covering it by half. Another key feature is the contrast profile in the end section. Not removable cover. Size: L64 H131

- **Blanket:** big plaid, inspired by Ancient Greece's "peplos". Multitask use: from simple blanket or antimacassar, it can be turned into a headrest as well as into a cushion-holding mantle. Its functional nature is also determined by the fabric choice: warm with wools, fresh with flax. The button's detail is quite precious: it is coated with the contrast profile's fabrics, matched with the riveted seaming that outlines boards. Available in the new range of linen and wools. Size: L140 H189

- **Aluminium tray** (3 mm thick) varnished in white, matt graphite grey. Size: P25 L80; P25 L94,6

System composed of six types of modules, originating a wide range of combinations and compositions, also thanks to a simple coupling system:

- **end module** with left or right armrest, L103 D96 H72
- **intermediate module**, L82 D96 H72
- **chaise longue module** with left or right armrest, L103 D175 H72
- **chaise large module** with left or right backrest, L175 D96 H72
- **inclined pouf module**, L103 D80 H38
- **island pouf module**, L96 D96 H38

The inclined pouf can be combined (side identified by the profile's detail) with the end or intermediate modules (thus generating daybeds); the island pouf, as well as being used individually, can play the role of an angular module.

Framework

The supporting structure is made of solid wood and plywood with a base equipped with elastic belts and feet. The padding is in variable density polyurethane, while the cover in polyester padding.

Coating and fabrics

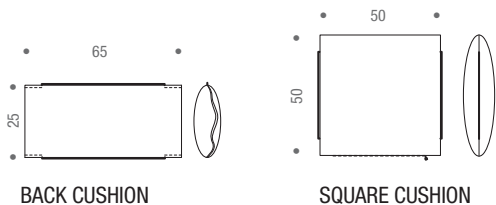

Coating covers every part of the sofa and is completely removable.

The collection's typical feature is the contrast profile that is present in all of the upholstered modules and accessories; available in the following colours: white, dove grey and dark grey, with free combinations on demand. System's customisation is ensured by a wide range of fabrics either with neutral or bright colours, either with structured or minimal weft and featuring high quality natural fibres. Leather version is not available.

An extra cover can be purchased for both the upholstered modules and the cushions.

For further information, please see page 35 on the price list and the "fabric collection" section on MDF website.

THEA accessories

BACK CUSHION

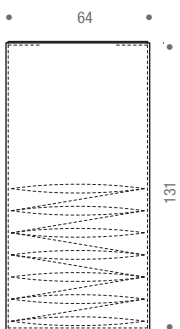

SQUARE CUSHION

With contrast profile to enhance its shape.

Contrast edging in three different colours (white, dove grey and dark grey)

QUILT

Quilting is the special feature, covering it by half. Another key feature is the contrast profile in the end section

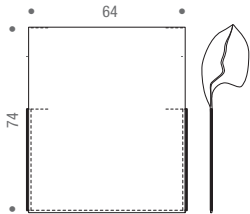

Double face, the quilt features a side combined with the sofa's fabric, while you can choose the other-one in the wide range of linen, silks and wools available.

TRAY

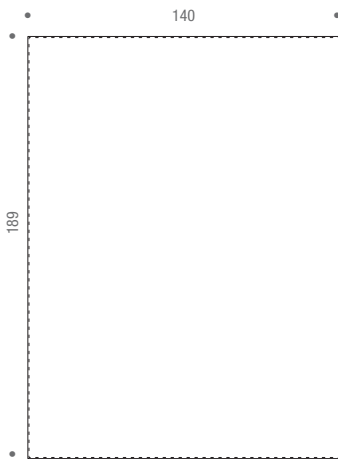

HEADREST CUSHION

With contrast profile to enhance its shape

Contrast edging in three different colours (white, dove grey and dark grey)

BLANKET

Multitask use: from simple blanket or antimacassar, it can be turned into a headrest as well as into a cushion-holding mantle.

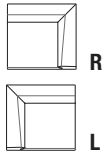

The button is coated with the contrast profile's fabrics, matched with the riveted seaming that outlines boards.

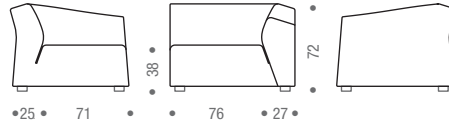

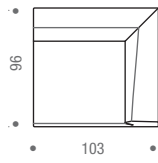

The new "dynamic accessory" concept meets different needs and uses. Moreover it is able to adapt and transform in time. It changes during the various moments of the day, it modifies and updates over the years.
