

## Crosscut trestles / Crosscut table

Faudet-Harrison

An ingeniously minimal design made from two pieces of laser-cut rectangular steel and six cylindrical oak legs. The legs are designed to fit neatly into three cross cuts in each piece of steel, making two legs face outwards while the centre leg faces inwards. The top face of each piece of steel has three cork pads that secure a table top in place. A refined and cleverly conceived design, these trestles are both exceptionally sturdy and visually light. The trestles are available as a standalone pair, or with a choice of 12mm toughened glass or 25 mm white laminate top. Available in cream or rust. Made in the EU.

trestle (x2)	W40 x D40 x H90 cm
table	W180 x D74 x H74 cm
