

## Kenneth armchair Faudet-Harrison

The Kenneth armchair by design duo Faudet-Harrison is a visually light piece that blends comfort with a formal sensibility. With space saving in mind, the armchair covers a small footprint and sits proudly on tall gently tapered solid ash legs. This piece is designed to create a cradle like sitting position, with curvaceous support provided by the generously upholstered arms and back. The armchair is made with an FSC approved beech frame, jute webbing and hessian straps and then covered with a mix of materials that includes natural fibres, animal hair and wool. The seat cushion is feather filled.
