

La Carice

Technical features

colour	: 2001 - 2013
production method	: tufted
pile material	: 50% pure new wool, 50% bamboo
pile height	: 40 mm
pile weight / m2	: 4800 gram
total weight / m2	: 5600 gram
number of colours	: 13
maximum size without seams	: 450 cm width, length unlimited
cleaning	: professional cleaning recommended
design	: danskina team
colour	: Helen de Leur

Durability

La Carice has been tested by TNO and is suitable for the private market.
This rug can be used with under-floor heating.

Maintenance

- It is important to vacuum your rug at least once a week to prolong its durability. The most effective way to remove dirt and dust is with the furniture cleaning attachment provided with your vacuum cleaner. A vacuum cleaner with a standard nozzle tends to remove less dirt and dust.
- Never use a rotating vacuum brush on this quality; this will permanently damage your rug.
- Vacuuming a new rug will produce fluff, but this is temporary. This fluff does not affect the quality of your rug.
- The ideal air humidity for the material is around 50%. Please note that if the air humidity is below 50%, the yarn becomes dry and its natural elasticity will decrease.
- If rubber soles are frequently walked over a rug, it will wear quicker, especially if rotating or shifting movements are consistently made in one place.
- In order to prevent heavy use on one particular location, we recommend turning your rug around once in a while.

Due to our use of natural materials, slight colour differences may occur.
