RANDOM 2C - 3C

Designed by Neuland Industriedesign

The iconic Random bookcase is renewed and the product range welcomes new modules and colours.

The two dimensional variants, named 2C and 3C, make Random flexible and adaptable to all spaces in a home and to different market demands.

The new elements can express unique style even if they are of modest size, perfect in small spaces or dedicated niches.

Also, when combined with the Random module, they renew the collection's modularity to create new and different configurations.
