SIGN MATT

Designed by Piergiorgio Cazzaniga

A natural evolution of the Sign project, which with its classic glossy finish transforms into a striking single-material unit with a matt finish.

The new material and the updated chromatic range make it possible to use this product both indoors and outdoors.

STRUCTURE

The single-material load-bearing structure is in polyethylene (PE), moulded with rotational moulding technology.

OUTDOOR USE

The particular resistance of polyethylene and its simple maintenance make Sign Matt perfect both indoors and outdoors.
