

Nami pendant Reiko Kaneko

A fine bone china pendant light, designed and hand made in Stoke-on-Trent, England. The form of the pendant is reminiscent of a bell, but with less of a flare at the bottom. It shines translucent when the bulb is on, while the fine bone china looks equally as beautiful when the light is off. It has a simple orange or green braided textile cable and uses the latest E27 7W or 4W low energy bulbs.

Made in the UK.
