

Puffer

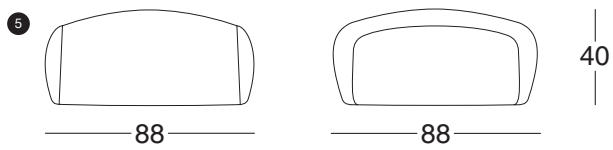

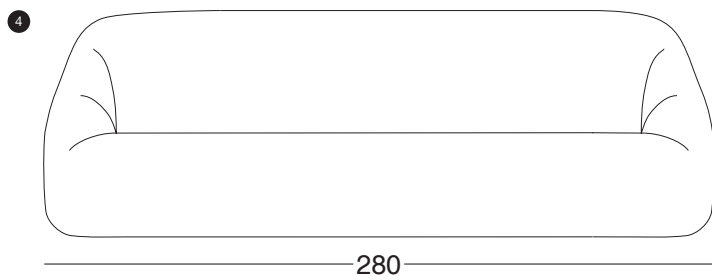

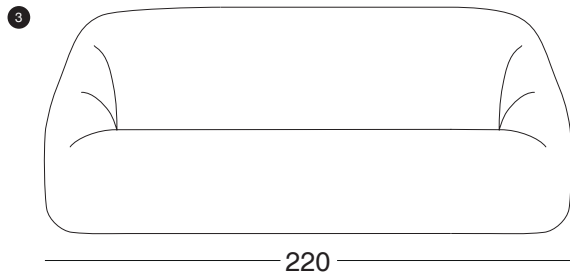

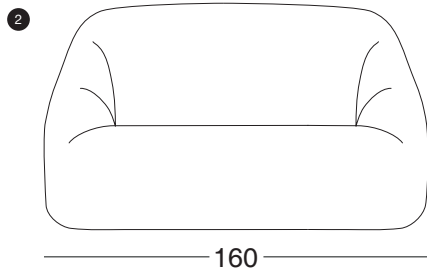

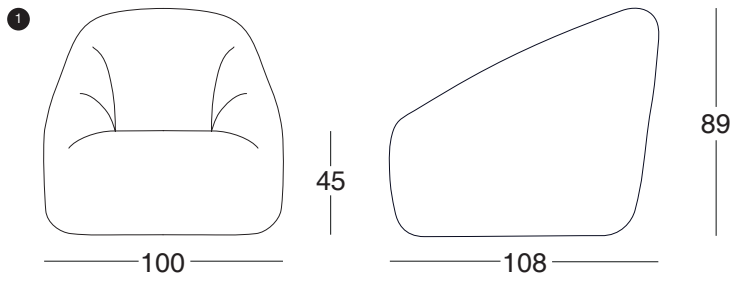

Philippe Malouin

Puffer has been created with a love of simple shapes and the idea of comfort as a function. Working closely with SCP's specialist upholstery factory, Philippe Malouin took inspiration from the feather filled puffer jacket, to create an upholstered chair that itself has a removable fully washable jacket. Impressively comfortable, this design shows a deep understanding of the possibilities of traditional upholstery making.

The solid beech frame has a pocket sprung seat and a zig zag sprung back, it is covered with natural fibres, hessian, rubberised hair, needled wool and interliner. The pockets within the jacket cover are made of four separate pure feather pads.

Made in Norfolk, England.
