TEOREMA — RON GILAD 2017

1—
3

The Teorema project is the solid part of a void. It is the flip side of Grado°, the collection that explores the form of a void. It is the mould as design, the template transferred and shifted that becomes micro architecture, and exceeds all disciplinary boundaries.

FEATURES

A series of units with drawers or open compartments having the structure completely faceted like a diamond and made of a single piece veneered in American walnut or eucalyptus. Teorema can be used alone as a free-standing unit, or compositions can be created by stacking various elements.
