## TRIM— DANTE BONUCCELLI 2007

Trim is a revolution. Space is the key feature of a system designed for the frantic pace of contemporary living, the organization of our homes, the need to mix technology and functionality. Drawers, cupboards and wall units are no longer enough. Now there are fully equipped back panels: the new space between wall units and worktop can be concealed by sliding the glass doors, with a mechanism patented by Dada. The LED lights and power socket units transform the back panel into the technological soul of Trim.

### Good Design Award (USA), 2008

photo finishings

- \_ light elm base units doors
- \_ matt ivory yellow worktop
- \_ Multitank sink
- \_ etched stopsol glass D|Frame wall units
- \_ Arc table by Foster+Partners (Molteni&C) diameter 160 cm and grey concrete base
- \_ Wire chairs by Charles & Ray Eames (Vitra)
