

TABLES

UniTable Meeting Table

The ideal meeting space framework

UNITABLE

The ideal meeting space framework

UniTable is a system that can be changed at any time because it is built around a structural element - an extruded aluminium beam - that can be used for one individual table or combined with other transverse beams. It also functions as a housing for cables. All of the system components are connected to this piece, so changes can be made whenever it becomes necessary: adding more workstations or changing the office's functional or aesthetic characteristics.

HIGHLIGHTS_1

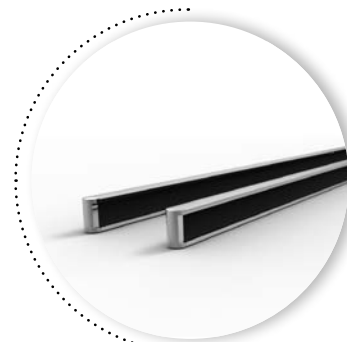

Beams

- › extruded aluminium beam, polished finish.
- › available in 18 different lengths, from 316 mm to 2136 mm.

Legs

- › die-cast aluminium leg, polished finish.

PMMI technical band

- › black decoration placed lengthwise

Glides

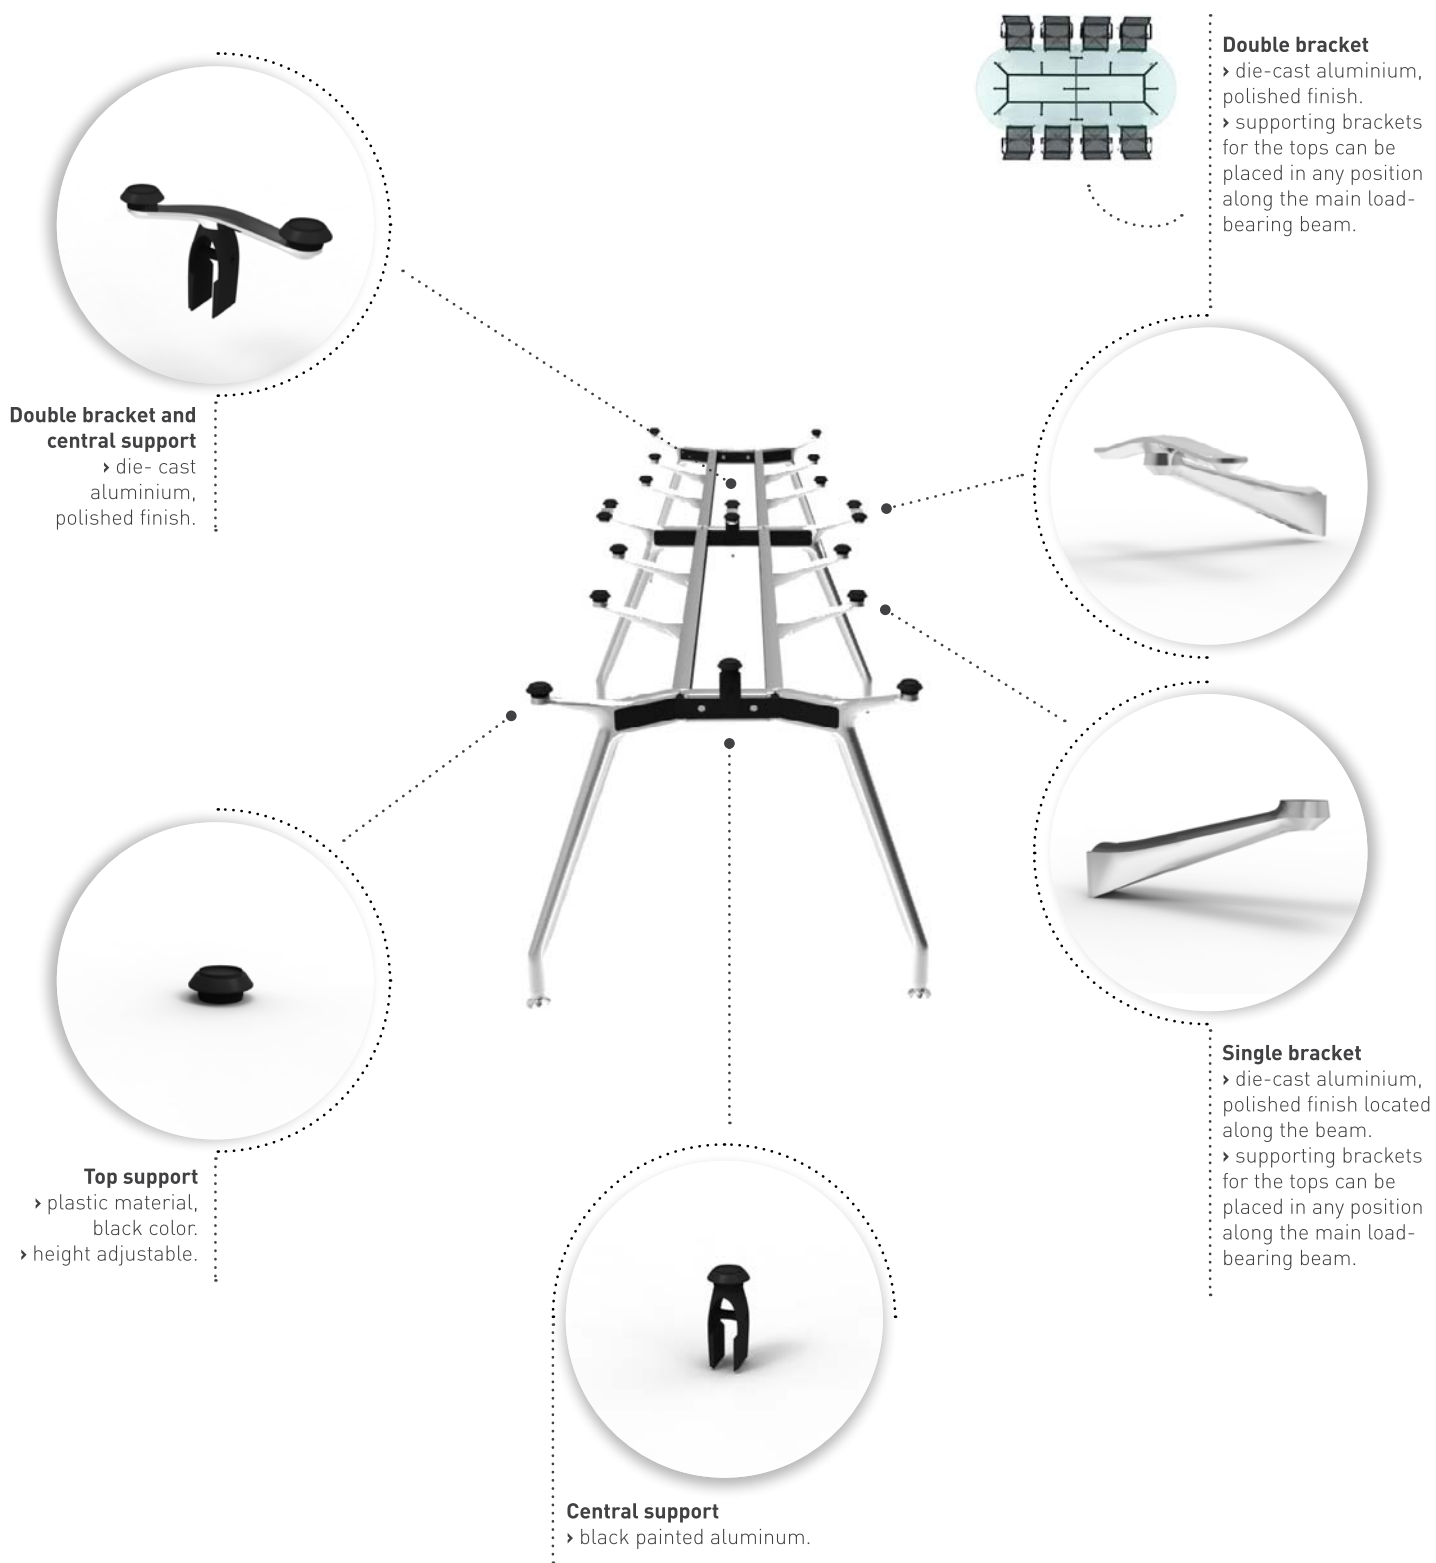

- › in chromed plastic material.
- › height adjustable for the positioning of the table.

Connectors

- › in black painted metal.
- › connectors allow the beams and bases to be joined at various angles, to make numerous configurations.

HIGHLIGHTS_2

Double bracket and central support
› die- cast aluminium, polished finish.

Double bracket
› die- cast aluminium, polished finish.
› supporting brackets for the tops can be placed in any position along the main load-bearing beam.

Top support
› plastic material, black color.
› height adjustable.

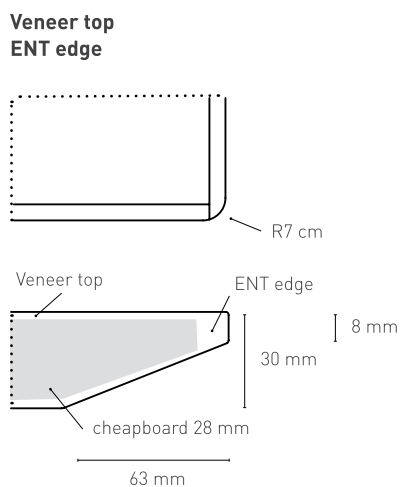

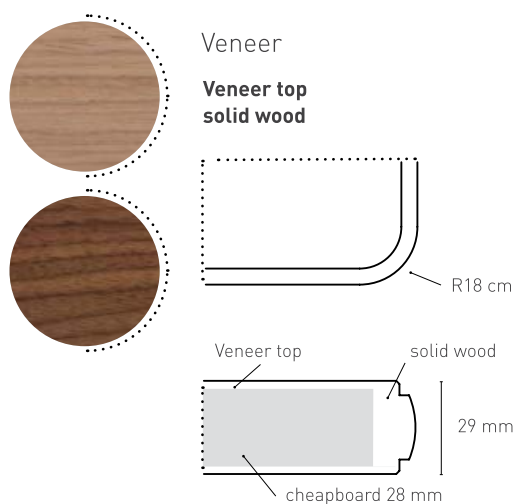

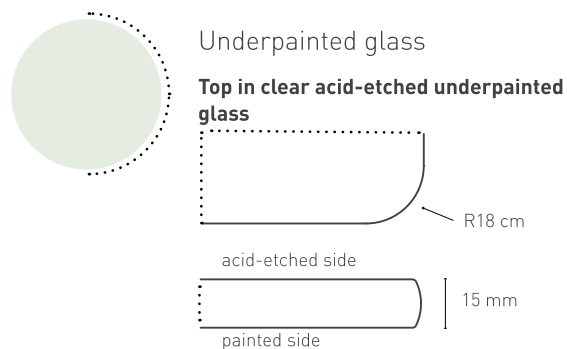

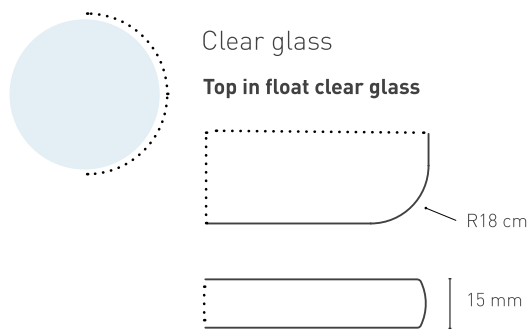

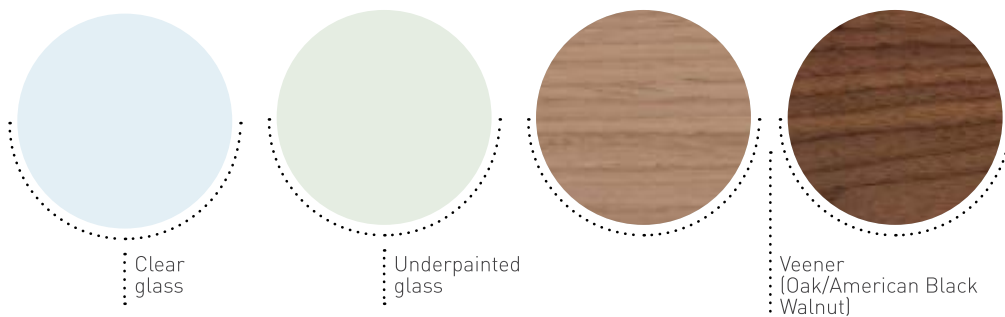

Central support
› black painted aluminium.

Single bracket
› die- cast aluminium, polished finish located along the beam.
› supporting brackets for the tops can be placed in any position along the main load-bearing beam.

FINISHES

Tops

Tops are available in different shapes and finishes, and are made in various modular dimensions. Transparent glass, thickness 15 mm, with shaped edges and rounded corners; underpainted glass (in white), thickness 15 mm, with sanded finish on the side resting on the frame; in veneer with solid wood or ENT edges, thickness 30 mm.

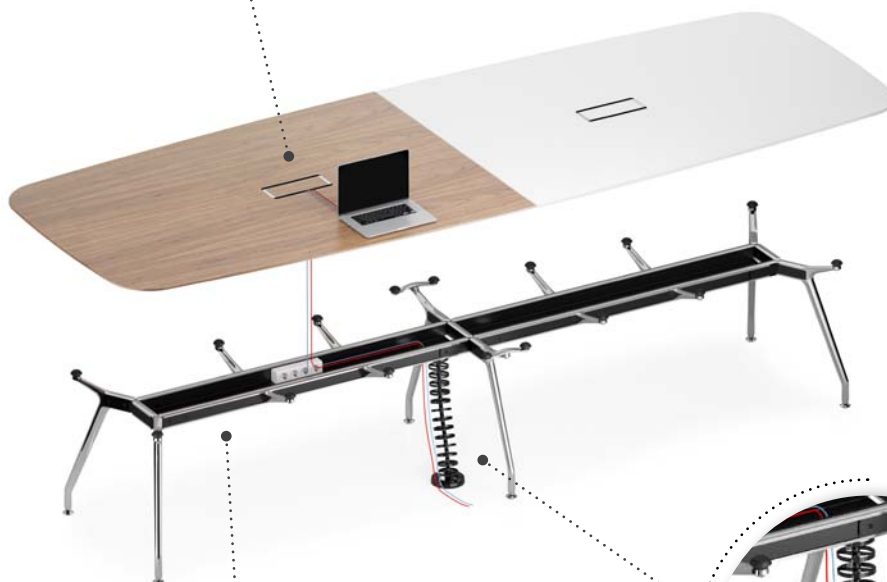

ELECTRIFICATION

Flip door

Flip door, cm 30, is placed in the center of the table top. It is formed from an aluminium frame and a central element in the same finish as the top.

The version ready for electrification in clear glass has a central insert in black underpainted glass.

Cable tray

Painted metal, black color.

Vertical cable duct

Plastic material, transparent or black color.
